TAEL Enters Third Decade

The Architects Enterprise, Ltd. (TAE) has proudly entered its third decade of rendering architectural, interiors and planning services throughout the Midwest and Mid-Atlantic United States. Since its inception in 1989, TAE has developed a reputation for sound design and solid project delivery, all while remaining true to the firm's philosophy of striving to thoroughly analyze and understand client's needs and to deliver innovative and cost-effective solutions that address those needs rather than just their symptoms.

Yves Jeanty Directs a Design Charrette

We feel privileged for the opportunity to contribute to the shaping of the built environment. At TAE, we view architecture not just as a profession or a means of earning a living, but as a vehicle through which we may contribute to the betterment of the human condition.

Continuing Service to Urban School Districts

At T A E L, we believe that the best tool for improving the lives of people, and for them to achieve their full potential, is a sound education. In light of this, T A E L has sought to remain an active participant in the ongoing efforts of major urban school districts to improve the quality of educational facilities.

Consequently, educational projects form a large percentage of T A E L's portfolio. During its more than two decades of service, T A E L has rendered services to school districts in Illinois, Michigan, New York, Pennsylvania and Washington, DC.
